FÉLIX SAUCEDO

Senior Software Engineer | Backend & Cloud Architecture

Santiago, Chile • felixsaucedo.com • contacto@felixsaucedo.com
LinkedIn: linkedin.com/in/felix-saucedo • GitHub: github.com/FelixSaucedo

PROFESSIONAL SUMMARY

Software Engineer with over 12 years of experience in software development, specializing in backend, API architecture, and high-concurrency integrations. Proven track record leading technical teams across LATAM while maintaining hands-on involvement in code and AWS cloud infrastructure. Pragmatic mindset focused on simple, robust, and scalable solutions to address critical business bottlenecks.

WORK EXPERIENCE

Head of Development LATAM / Technical Lead – Minga Digital

September 2019 – August 2026 | Santiago (Remote)

- Led the regional engineering team with direct involvement in architectural design, core feature specification, and code reviews.
- Designed and implemented the regional analytics and reporting platform centralizing data from multiple DSPs through asynchronous processing on AWS (Lambda, SQS, S3), Redis, and BigQuery.
- Engineered scalable microservices and RESTful APIs using Node.js, TypeScript, and PHP (Laravel), automating synchronization between CRMs, ad tech platforms, and internal systems.
- Established continuous engineering standards through CI/CD pipelines, automated testing, and a culture of small pull requests to ensure stable deployments.

Technologies / Stack: Node.js, TypeScript, PHP (Laravel), PostgreSQL, MySQL, Redis, AWS (Lambda, SQS), Docker, BigQuery, Git.

Developer / Technical Analyst – Desis S.A.

October 2017 – September 2019 | Santiago, Chile

- Reduced critical database processing times from 15–20 minutes down to 1–2 minutes through refactoring and SQL query optimization.
- Developed and maintained transactional systems for electronic invoicing and payment gateways under stringent regulatory and security compliance standards.
- Coordinated technical analysis and production incident resolution, providing continuous technical mentorship and guidance to development and support teams.

Technologies / Stack: PHP, PostgreSQL, MySQL, JavaScript, Docker, Git.

Full Stack Developer – Estudio Suma S.A.

July 2013 – October 2017 | Santiago, Chile

- Designed and built custom transactional web platforms for corporate clients across various industries.
- Engineered the contingency and signal outage management platform for a satellite television provider, significantly decreasing operational response times.

Technologies / Stack: PHP (CakePHP), MySQL, JavaScript, HTML5, CSS3, REST APIs, Git.

TECHNICAL SKILLS

Backend & APIs: Node.js, TypeScript, PHP (Laravel, CakePHP), REST APIs, GraphQL, Microservices, Asynchronous processing.

Databases: PostgreSQL, MySQL, Redis, MongoDB, BigQuery, SQL indexing & performance tuning.

Cloud & DevOps: AWS (Lambda, SQS, S3, EC2), Docker, Linux, Bash, CI/CD, Git.

Frontend: React.js, Modern JavaScript, HTML5, CSS3, API integration & consumption.

Best Practices: Code Reviews, Unit Testing, Clean Architecture, SOLID Principles, Scrum / Jira.

EDUCATION & ADDITIONAL INFORMATION

B.S. in Computer Science / Software Engineering (Ingeniería de Ejecución en Informática) – Instituto Profesional ESUCOMEX | Graduated (2016)

Languages & Availability: Spanish (Native) • English (Technical: reading and writing specifications, API contracts, and technical documentation) • Immediate Availability.
